

November 19, 2019

The Honorable Sam Graves  
Ranking Member  
Committee on Transportation & Infrastructure  
United States House of Representatives  
Washington, DC 20515

The Honorable Rick Crawford  
Ranking Member  
Subcommittee on Railroads, Pipelines, and Hazardous Materials  
United State House of Representatives  
Washington, DC 20515

Dear Ranking Members Graves and Crawford:

Thank you for your leadership in support of pipeline safety. With your support, the House Transportation and Infrastructure subcommittee with jurisdiction over pipelines has pursued important bipartisan improvements to federal pipeline safety laws.

Modern federal pipeline safety requirements are needed to keep pipelines operating safely. The U.S. pipeline network is already the safest in the world. Pipeline operators recognize, however, there is more we can and should do to improve pipeline safety.

Earlier this year, the Committee hosted a hearing to review proposals to harness new technologies and best practices to improve safety, learn from past pipeline incidents and improve ability of the U.S. Pipeline and Hazardous Materials Safety Administration to administer federal pipeline safety requirements. Unfortunately, many of the proposals made to improve pipeline safety were left out of H.R. 5120, the bill the Committee will mark up.

The bill you introduced, the *Pipeline Safety Improvement Act of 2019*, contains more provisions that will improve pipeline safety, such as promoting voluntary information sharing, piloting new safety technologies, and modernizing the class location change program.

We appreciate your leadership advancing these proposals and look forward to assisting the committee in bipartisan legislation to improve pipeline safety.

Sincerely,

American Fuel & Petrochemical Manufacturers  
American Gas Association  
American Petroleum Institute  
American Public Gas Association  
Association of Oil Pipe Lines  
GPA Midstream Association  
Interstate Natural Gas Association of America
